DETAILED ACTION

Receipt is acknowledged of Preliminary Amendment filed on June 19, 2001.

Claims 1-6 have been cancelled and new claims 7-25 are now pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 is rejected because the term "enhancing" is a relative term. There is no indication to what the enhancing moisturizing properties are being compared, and the metes and bounds of the patent protection sought are unclear.

The remaining claims are rejected as depending on the indefinite base claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 7-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hensen (DE 19756454 C1), or alternatively, in view of Hill et al. (U.S. Pat. No. 5,733,536).

Hensen et al. teach the use of 1-50 % by weight of glycerol carbonate based on surfactants for cosmetics including hair shampoos, lotions, creams or bubble bath. See p. 1, lines 10 – 39; p. 6, lines 59 – 64.. The reference teaches that glycerol carbonate is used as an emulsifier and replacement for silicone in p. 6, lines 50 - 56, and provides brightening and antistatic activity and improves the dry combing properties, while stabilizes active agents which are not readily emulsified. The reference lacks the explicit teaching of using the glycerol carbonate to enhance moisturizing effect of the composition.

Hill et al. teach hair care compositions containing silicone dispersion. The reference teaches that the dispersed silicone as contained in hair care products provide conditioning and moisturizing of hair. See abstract.

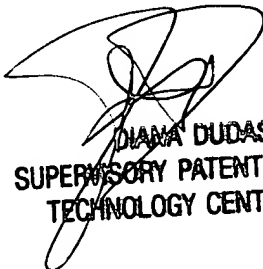

Although the reference fails to expressly teach its use as a moisturizer, examiner takes the position that since the composition of Hensen et al. meets the limitation of the instant claims, the moisturizing benefit of the composition is necessarily present. Alternatively, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used Hensen et al.'s composition, to provide moisture on skin or hair, as suggested by Hill et al., because of the expectation that the glycerol-carbonate-containing composition would successfully provide similar moisturizing effect as silicone.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mazo et al. (U.S. Pat. No. 5,939,517); Berthiaume (U.S. Pat. No. 5,672,338).
